

Tesseract PWA MINI App

Demo: app.gscloud.cz

Repository: github.com/GSCloud/app

Distributed under MIT license.

Installation

- `git clone https://github.com/GSCloud/app.git`
- `make install update doctor` - do all the dirty work and checks
- modify accordingly to your requirements:
 - `.env` - environment
 - `app/ApiPresenter.php` - REST API presenter
 - `app/AppPresenter.php` - main presenter
 - `app/config.neon` - main configuration
 - `app/router.neon` - main router
 - `app/router_api.neon` - REST API router
 - `www/img/logo.png` - application logo
 - `www/manifest.json` - PWA manifest
 - `www/partials/body_content.mustache` - main application
 - `www/partials/content.mustache` - page content
 - `www/partials/navigation.mustache` - navigation
- point Apache vhost to `www/`
- `make update test sync prod` - update, local test, synchronization, production test

Docker

TBD.
